

Due to the recent developments in the ongoing COVID-19 global pandemic, in order to secure the health and well-being of all our students the Senate of Alanya HEP University has decided to employ distance education mode for the fall semester of 2020-2021 Academic Year. Accordingly, all the courses, course activities, assessment and evaluation will be carried out within the scope of distance education. The parts of the curriculum that require face-to-face interaction will be, in addition to the distance education materials and virtual interaction, conducted in person at the end of the semester or during the following semesters in accordance with the directives of the Council of Higher Education and the Ministry of Health, and taking the participation possibilities of our students into consideration. Dates of the beginning of the academic year and the registration renewal have been announced on our university website. We hope that this pandemic will be over very soon. However, at the same time we consider this process an opportunity to implement a more effective and efficient model of higher education through the rational integration of digital technologies. Accordingly, we have directed all our efforts to conduct a comprehensive online education that makes the most of the potential of digital technologies and provides more effective learning than face-to-face teaching.

It is announced with respect to our students and the public.
